NATURAL ESSENTIALS ISOJUICE PRO LIMITED EVO SERIES

**TRAIN HARD
DREAM BIG**

COMPANY

About us

Starlabs Nutrition was born in 2012 as a sports nutrition brand focused on satisfying the needs of the most demanding athletes.

We are in continuous development and specialization to offer better products with the most complete and effective formulations, being pioneers in the sector thanks to our quality seals and always being at the forefront in the use of raw materials.

Our catalog covers a wide range of products ranging such as the classic protein powder to the most powerful thermogenic, and without forgetting those food supplements that can help improving the health of any individual.

Do you want to have the opportunity to try the very newest formulations with the highest quality? Think of Starlabs.

Do you want your sport bag to attract attention at the gym thanks to its elegant and cool design? Look out for reaction from everyone when you use our shaker or wear any of our accessories.

Our hallmark is present on everything we do, always paying attention to the details and thinking about the consumer with every step we take.

It is not a coincidence that we are already present in more than 30 countries...

Our concept: The Trainity

What is The Trainity?

The Trainity is an abbreviation of the three virtues in sports: Train, Eat and Sleep.

- **Train.** It is during training where the athlete is forged, where we acquire a perseverance and discipline and we improve our strength and inner growth.
- **Eat.** Food represents us, our health, our way of life. We complement our training by providing the optimal raw materials, not only to grow physically, but to improve from the inside.
- **Sleep.** Every athlete needs a recuperative sleep at the end of the day. This moment makes our organs recover from everyday wear and intense training, preparing for the next morning.

If you want to become a complete athlete, you need the balance among all three, as they are the basis of your endeavor to persevere for your desired results and marks.

QUALITY
VERIFIED
INDEPENDENT
LAB ANALYSIS
CERTIFICATION

QUALITY - FROM NATURE TO YOUR HEALTH

Starlabs wants to accompany you every day, whenever you train, when you eat, while you are sleeping... and for that, we need to provide you the best products with the best quality.

This is about commitment.

It is no use knowing us if we are not able to give you what you need every time, and this is why there is a commitment on our part: the commitment to offer you the best raw materials and the best manufacturing standards.

Do you know what is the GMP certificate? GMP certification ensures that our products are consistently produced and controlled according to quality standards.

Did you know that all products in Starlabs are manufacturing under GMP conditions? GMP is designed to standardize the final product and prevent the risk of production mistakes in each step of the pharmaceutical production. A GMP certification is there by one of the most important consumer insurances for a quality product... But we go further: **we guarantee athletes that all batches of their products and raw materials have been analyzed and being safe for human consumption.**

Our hallmark: assurance from the beginning

What other quality standards do we meet in Starlabs Nutrition?

HALAL Certificate: in order to keep consumers of Muslim origin safe, HALAL guarantees that products meet the requirements of Islamic law and therefore are suitable for consumption. Halal certificate is managed by "Halal Institute" and ensures the following:

- The products do not include, nor contain in their composition, anything that is considered illicit under Islamic law.
- Food and food supplements have been prepared, processed, transported or stored, using devices or means that are exempt from that which is illegal according to Islamic law.
- The products have not been in direct contact with other foods that do not meet the above requirements.

What is stated on the label is what's on the inside your product.

All products on **Starlabs** are under strict quality controls that are carried out by certificated laboratories with a GREAT experience in this sector, ensuring the quality of each batch and offering you a truthful information of what every product contains, as it is shown on the label.

PROTEINS

MYOBOLIC™

100% WHEY PROTEIN FUSION

- With ISOLAC® whey protein isolate, OPTIPEP 80® whey hydrolyzate, Lacprodan SP8011® whey concentrate and Lacprodan Micelpure® micellar casein.
- Sustained delivery protein for a fast absorption and several hours supplying of amino acids into the bloodstream.
- Irresistible flavors to enjoy after training or at any time of day.

WPF8 MYOBOLIC™ 2.0 is the maximum exponent of the last generation of sequential release proteins to provide the athlete a very fast and effective Post-workout protein, as well as several hours supply of amino acids into the bloodstream thanks to its very high bioavailability.

WPF8 contains more protein percentage than any other sequential protein on the market. With a blend of fast assimilation proteins of the highest quality (whey protein isolate **ISOLAC**®, whey protein Hydrolyzate **OPTIPEP**® and whey protein concentrate **Lacprodan SP8011**®), this rapid assimilation protein matrix will provide an ultra-fast release of protein that will facilitate maximum muscle recovery after training, repairing muscle damage thanks to its high concentration of BCAAs.

49g Protein*
0,0g Trans fat

Moreover, the slower digesting protein micellar casein **Lacprodan Micelpure**® will maintain amino acid pools and positive nitrogen balance after the whey protein has plunged off.

Thanks to its low percentage of carbs and its sequential delivery, **StarLabs WPF8 MYOBOLIC™ 2.0** is the perfect tool for those athletes looking for the maximum recovery and lean mass building.

HOW TO USE:

Mix 30g (1 scoop) with 200-300ml of cold water or free-fat milk. Consume twice a day, one of them preferably after training (for the most optimal recovery).

WPF8PRO
Sustained Release Protein

LACPRODAN®
SP 8011 INSTANT VEGETARIAN

HYDROPRO™

HYDROLYZED WHEY PROTEIN

- Main contribution of hydrolyzed whey protein concentrate OPTIPEP 80®.
- Pre-digested protein for a fast absorption and gastric emptying.
- Supplemented with whey protein concentrated Lacprodan SP8011® for increased stomach stability.
- Irresistible flavors, better than any other hydrolyzed protein on the market.

No other protein source comes close in quality and speed of absorption than HD8 HYDROPRO™, improving and accelerating the transport and assimilation of amino acids, in addition to providing rapid gastric emptying to avoid heaviness or stomach discomfort.

All this makes it the ideal protein for those who are going to eat immediately after consuming it, for those who suffer from some type of gastrointestinal pathology or those who seek the fastest assimilation of nutrients.

The main protein source of HD8 HYDROPRO™ is Optipep 80®, a hydrolyzed whey protein concentrate developed under the highest quality standards. The advanced hydrolyzing process means that the whey protein is broken down into smaller pieces (peptides) and amino acids that are maintained by the muscles. Thanks to this we obtain a raw material with very low percentages of fat, carbohydrates and lactose.

WHEYCORE™

100% WHEY PROTEIN FUSION

- 100% concentrated whey protein LACPRODAN SP8011® of high biological value.
- Fast absorbing protein with irresistible flavors and high native percentage of BCAAs and EAAs.
- Gluten free and suitable for vegetarians.

It is often difficult to meet daily protein requirements due to the lack of time to cook or make the necessary meals. This means that we don't have the necessary amount of proteins to maintain correctly our organism, to recover after exercise or to increase our lean mass. That's why sports nutrition plays a big role, for those who want to follow a balanced diet or those who are seeking to reach their maximum performance.

StarLabs W74 WHEYCORE™ is the perfect tool to meet daily protein requirements. It contains all protein fractions such as Beta lactoglobulin, alpha lactalbumin, bovine serum, immunoglobulin, lactoferrin and glycomacropeptides.

27,5g **0,0g** **Free**
Protein* Trans fat Aspartame

W74 WHEYCORE™ is made entirely from the renowned raw material LACPRODAN SP8011® from ARLA™, a concentrated whey protein of the highest quality, with up to 80% purity and a reduced percentage of fats, carbohydrates and sodium, which represents a perfect balance for the most complete nutritional intake, between meals or after training for the most complete recovery.

HOW TO USE:

Take 1 scoop (approx. 35g) with 6-7 oz (180-200 ml) of cold water or your favourite beverage, shake for 20 sec and drink immediately. Change the amount of liquid to achieve your desired flavor and consistency. Drink 2 servings daily.

BIG MUSCLE™

PROTEIN & OATS COMPLEX

- Promotes muscle growth and repair thanks to its 3 different protein sources.
- Low Glycemic Index Carbohydrates to improve energy recovery and to improve intestinal tract health, maintaining constant blood glucose levels.
- It's the perfect product to drink as a shake after training or as premix to prepare delicious pancakes with the highest percentage of proteins, without sugar

BM4 BIG MUSCLE™ Protein & Oats is loaded with a blend of slow and fast release proteins and oats, a slow burning complex carbohydrate. It provides considerable amounts of essential amino acids (EAAs), especially the three branched chain amino acids (BCAAs), that you can enjoy either in liquid format through a shake, or solid, as a premix to make protein pancakes without added sugars.

The multiple high quality proteins in **BM4 BIG MUSCLE™** provide your muscles with sustained amino acid delivery. The 4 types of protein are cross flow whey protein concentrate **Lacprodan SP8011®** (fast action and absorption), egg albumen (intermediate action and one of the best muscle building foods), micellar casein **Lacprodan Micelpure®**

PROTEINS

MICELLAR CASEIN™

SLOW RELEASE PROTEIN

- Patented Micellar Casein Lacprodan Micelpure® for a slow and steady release of amino acids compared to other protein types.
- Supplemented with concentrated whey protein Lacprodan SP 8011® for a more stable mix.
- Complemented with digestive enzymes to improve gastric health and absorption of nutrients.
- Helps to combat the natural loss of muscle mass during fasting or rest period.

PM8 Micellar Casein™ contains Micellar Casein mainly, the main proteinaceous component of milk that has a rich pool of essential amino acids. When ingested, casein forms a gel or clot in the stomach and intestines, which slows down the rate of the gastric emptying. This slowing effect has an impact on the rate at which amino acids are being absorbed into the blood stream. The stream of amino acids will remain elevated for up to 8 hours.

Another benefit of PM8 Micellar Casein™ is that it contains a source of digestive enzymes aimed at improving nutrient absorption. With lactase to improve the digestion of lactose and reducing the stomach discomfort that it usually produces, in addition to bromelain and papain as enzymes responsible for the digestion of protein and beneficial for reducing cellular inflammation.

25g Protein* **11g** Essential Amino acids* **Slow** Acting

PM8 Micellar Casein™ is supplemented with a small amount of Lacprodan SP8011® whey protein concentrate that improves mixability, texture and digestion, as well as increasing the percentage of total branched chain amino acids (BCAAs).

HOW TO USE:

Take 1 scoop with 300ml of cold water or your favourite beverage, shake for 20 sec and drink immediately. Change the amount of liquid to achieve your desired flavor and consistency.

MYOGAINER™

ADVANCED MUSCLE BUILDER

- 1131 calories per daily dose for a maximum gain of muscle mass.
- Hypercaloric formulation based on proteins and fast absorption carbs for accelerated weight gain and anticatabolic effects.
- Gluten free, low lactose and suitable for vegetarians.

To gain weight the right way, your training must be accompanied by a healthy diet and enough calories. Eating the right amount of nutrients needed for muscle growth can however sometimes be difficult due to a stressful everyday life and eating on the go.

Now with **XXL Myogainer™** it has never been easier to gain weight and build impressive size and strength! **XXL Myogainer™** contains a higher dose of proteins than any other gainer on the market. With about 16% of whey protein concentrate **Lacprodan SP8011®**, it ensures a high protein contribution that will improve muscle recovery and will increase the building of lean mass thanks to a great concentration of BCAAs.

CARBOHYDRATES & GAINER

CARBOFUSE™

AMYLOPECTIN CARBOLOADER

- 100% pure amylopectin without any others added carbs.
- Low fat, sugar and gluten free, and does not cause swelling, bloating and water retention
- Low Glycemic Index which provides fast and sustained energy during your intense training routine.
- The best option to consume before, during or after training to achieve the maximum performance.

A70 CARBOFUSE™ is only composed by amylopectin of the best quality, without added sugars. Waxy Maize is one of the best carbohydrates created to achieve the maximum performance on athletes. A70 CARBOFUSE™ is therefore an efficient supplement for athletes who need a fast restoration of glycogen.

A70 CARBOFUSE™ has a high molecular weight and low osmolarity, which gives it a unique ability to bypass the stomach and allowing it to be absorbed directly into the muscles; preventing from any sensation of satiety, heaviness or gastrointestinal problems.

93%
Amylopectin

Low
Glycemic index

Glycogen
Recovery

At the same time, A70 CARBOFUSE™ has a Low Glycemic Index which provides fast and sustained energy during your intense training routine enabling you to push your body and muscles even further. The energetic contribution is prolonged without the insulin spike that would cause a loss of energy caused by hypoglycemia after that.

Take A70 CARBOFUSE™ before or during training to create an increase in carbohydrate oxidation and be able to perform more work during your training due to its ergogenic effect. When taken after training, there is a great window of opportunity for the advantages of A70 CARBOFUSE™, as its quickness to provide glycogen resynthesis assists the muscles to recover rapidly and efficiently making your body ready for the next training session in a shorter period of time.

HOW TO USE:

Mix 1 scoops (35g) with 300ml of water or your favorite beverage. Mix for 20 seconds and drink immediately. Take 1 time a day.

- **Improves and increases immunological system function.**
- **Reduces acidosis and muscular fatigue during training.**

GLUTAMINE is the most abundant amino acid found in the body and is also known as a non- essential amino acid. It is used for various functions in human metabolism and is the ultimate amino acid when it comes to repair, recovery and reducing muscle soreness.

GLUTAMINE is an important fuel source for the cells of the immune system. It can help athletes fight disease and infection because it helps to maintain the health and integrity of the gastrointestinal tract, which is vital to preserve overall well-being. It is also a source of fuel for the cells of the intestine, which improves its function and absorption. Better absorption of nutrients allows an increase in the supply of nutrients to the muscle, promoting their growth.

5000mg

L-Glutamine

GLUTAMINE may become conditionally essential under some circumstances. During intense training the body can lose up to 50% of its glutamine levels making it unable to naturally synthesize enough glutamine to meet its needs. If your immune system or other parts of your body becomes glutamine-deficient, the muscles glutamine stores will be the first ones to be used, because of this it is important to have sufficient levels of glutamine.

GL5 from **Starlabs Nutrition** uses exclusively **KYOWA** L-Glutamine, one of the best and most awarded Glutamine patents, from plant sources, being suitable for vegans.

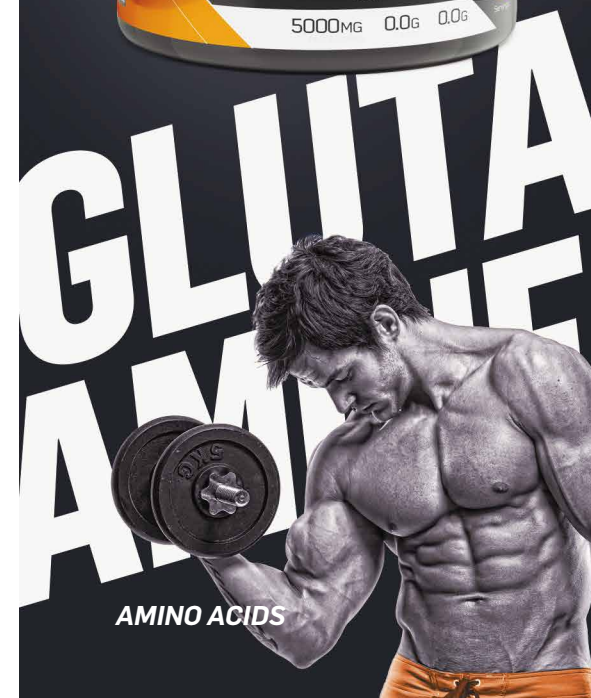

HOW TO USE:

Mix 1 scoop (or 1 rounded teaspoon) with 8 oz (240ml) of water. **GL5** can also be added to your favorite protein beverage.

EVO SERIES

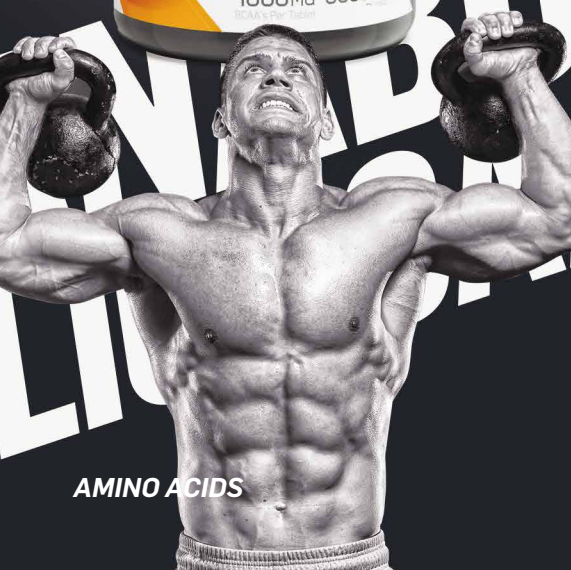

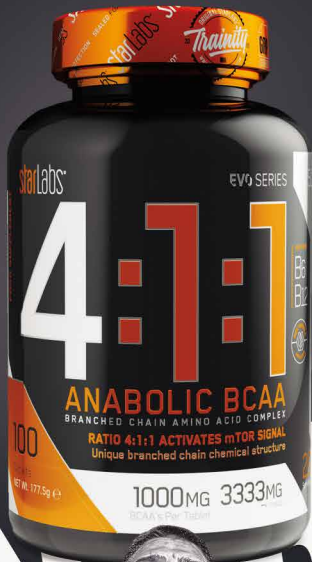

GL5

AMINO ACIDS

EVO SERIES

4:1:1

ANABOLIC BCAA™

BRANCHED CHAIN AMINO ACID COMPLEX

- Branched Chain Amino Acids instand and fermented from plant sources.
- 4:1:1 (Leucine, Isoleucine, Valine) rate to increase mTOR pathway, to improve protein synthesis and to maximize lean mass building
- 1g BCAAs per capsule.
- Complemented with B6 and B12 vitamins to improve the absorption of nutrients and to maximize performance.

4:1:1 BCAAs consist of L-Leucine, L-Isoleucine and L-Valine and are commonly referred to as Branched-Chain Amino Acids because of their unique branched chain chemical structure setting them apart from other amino acids. BCAAs are essential amino acids meaning that they cannot be synthesized by the body but must be supplied through the diet.

The body uses BCAAs to promote healing of injured tissues, **speeding up the recovery process**, and **to protect itself against breakdown of the muscle tissue during exercise**. BCAAs are also important for developing and building muscles. **Studies have furthermore shown BCAAs to be helpful in other areas as well, due to the action of the single ingredients.**

1000mg
BCAAs per tablet

3333mg
L-Leucine

833mg
L-Isoleucine

833mg
L-Valine

Leucine is necessary for wound recovery of skin tissue and in bone structures and it helps protect muscles; valine helps promote and maintain nitrogen balance (essential for muscular development); and isoleucine helps boost energy and is necessary for forming hemoglobin (a protein-based part of red blood cells that transfers oxygen throughout the body).

What makes Starlabs® Nutrition's 4:1:1 ANABOLIC BCAA formula special is the ratio of leucine to isoleucine and valine, which is 4 to 1. Leucine has been identified to be a key regulator of skeleton muscle anabolism and activates mTOR signal for protein synthesis.

The quality and purity of AMINOFERM amino acids is based on its production from fermented plant sources and not from animal remains, being suitable for vegans, lactose and gluten free.

HOW TO USE:

Take 1 serving (5 tablets) immediately after completion of exercise.

ARGININE™

ARGININE ALPHA-KETOGLUTARATE

- Promotes the production and release of endogenous nitric oxide (NOX).
- Stimulates the production of Growth Hormone, accelerating muscle recovery.
- Vasodilator effect.

AKG ARGININE™ 3.000 is based on its arginine content, necessary for the synthesis of Nitric Oxide in the liver and with a vasodilator effect, in combination with the amino acid alpha-ketoglutarate.

This combination increases Nitric Oxide concentrations in the liver much more.

AKG ARGININE™ further promotes the endogenous release of glutamate, a necessary amino acid for protein synthesis, and helps to decrease oxidative stress in the intestine. Glutamate is also important for the functioning of Central Nervous System, being the most common excitatory neurotransmitter.

3000mg *Growth Factor*
L- Arginine *Precursor*

Supplement Facts

Serving Size: 3 capsules. Servings Per Container: 60

	Amount per serving (3 caps.)	per 6 caps.	%RI*
L-Arginine Alpha-Ketoglutarate	3.000mg	6.000mg	†

* RI Reference Intake for an average adult (8400Kj/2000 Kcal).

† Daily Value not established.

AVAILABLE FORMATS: 180 Capsules (198g).

Increasing the endogenous production of Nitric Oxide you achieve a dilation of the capillary vessels, improving the blood flow and, therefore, the supply of nutrients and oxygen to the whole organism, promoting a great muscle congestion and hardness.

AKG ARGININE™ 3.000 and Nitric Oxide amplify beneficial effects for muscle synthesis provided by nutritional supplements and training.

HOW TO USE:

Take 3 caps in the morning and 3 caps prior to exercise on an empty stomach.

BE3

BETA-ALANINE™

NATURAL CARNOSINE BOOSTER

- Pure beta-alanine source without additives.
- Delays fatigue and increases performance.
- Enhances endogenous Carnosine synthesis.

Beta Alanine is a non-essential amino acid used by muscle cells to synthesize carnosine. Carnosine is a dipeptide (beta alanine + histidine) that acts as a buffer to neutralize hydrogen ions produced during strenuous exercise, helping to maintain optimum muscle pH.

Clinical studies have shown that beta-alanine supplements can increase the level of carnosine and delay muscle fatigue.

Carnosine has important physiological functions as an important antioxidant. Regarding exercise, the increase in the concentration of carnosine is very relevant, taking into account that it improves the sensitivity to calcium in muscle fibers and is also used in the muscle cell as a buffer to control intracellular pH. As it has been shown in several studies, it has been postulated that the accumulation of acid in muscles contributes to fatigue, resulting in less effective training and less muscle building.

BE3 Beta-Alanine™ has a high contribution of Beta-Alanine per capsule and is the ideal supplement for any high-level athlete that wants to reduce muscle fatigue and increase performance, as well as for anyone looking for a powerful anti-aging effect and a purifying function (thanks to the removal of heavy metals).

Once or
twice a day

HOW TO USE:

Loading phase	Take 6 caps spread over 3 doses during the day for the first 2 weeks.
Maintenance phase	Take 3 caps spread over 3 doses during the day.

REFUEL™

BCAA + GLUTAMINE RELOAD SYSTEM

- Next generation formula based on instant and fermented amino acids and electrolytes.
- With BCAAs AMINOFERM, KYOWA Glutamine and Osmovol + Electrolyte complex.
- Improves recovery and muscle building with a powerful anticatabolic effect.
- Replacement of mineral salts lost during training.

This unique formula has been developed under the highest quality standards to achieve the perfect muscle recovery in the most serious athletes.

XT5 from Starlabs offers you the highest quality branched chain amino acids (BCAA), AMINOFERM, one of the best sources of fermented vegetable amino acids, in a ratio of 2:1:1. It has been complemented with Kyowa L- Glutamine, which promotes complete muscle recovery and creates a powerful anti-catabolic effect, facing the loss of muscle mass and improving the assimilation of proteins after training.

To obtain the most complete amino acid complex, the formula has been improved thanks to **OSMOVOL+**™ hydration complex, that stabilizes cell water balance, replenishes electrolytes and improves nutrients absorption and performance.

CR5

CREATINE

CREATINE™

ULTRAPURE CREATINE MONOHYDRATE

- Creatine Monohydrate of the best quality with a high purity and bioavailability.
- Enhances mTOR pathway and provides a volumizing effect by improving intracellular water retention.
- Restores ATP stores for a rapid supply of explosive energy thus delaying fatigue.
- 99,5% purity thanks to a 200 mesh micronization.

CREATINE is a nitrogenous organic acid that our body is capable of producing in the liver through the synthesis of arginine, methionine and glycine (tripeptide) and is one of the most studied molecules within the field of supplementation and sports nutrition and with more scientific evidence on its effectiveness.

Although the body is capable of endogenously synthesizing creatine, supplementation with creatine monohydrate has been shown to improve sports performance and recovery from fatigue and physical stress. This occurs thanks to the synthesis of ATP, the main source of energy in most cellular functions.

Thanks to a cellular hyperhydration effect, **Starlabs® CR5 Creatine™** is the perfect tool to achieve a volumizing effect, so for optimal results it is recommended to stay hydrated throughout the day.

Use **Starlabs® CR5** to maximize your overall athletic performance.

CR5 Creatine™ presents 200 Mesh Finest Quality, that is the finest Micronized quality 100% pure creatine monohydrate available in the market today; most of brands usually work with 80 mesh creatines, with a larger size that reduces its bioavailability and its assimilation.

HOW TO USE:

Mix 1 scoop with 8 oz (240ml) of water or juice 1 time daily, stir with a spoon. **CR5** can also be added to your favorite protein beverage.

KR2 Creapure® pH 10

ADVANCED PH BALANCED CREATINE

- Patented creatine monohydrate formula with a stable alkaline pH of 10.
- Increases ATP synthesis to get the maximum explosive strength.
- Improves endurance during high intensity workout.
- No conversion to creatinine.

KR2 Creapure® pH 10 is a fast-acting creatine supplement that improves resistance without causing fluid retention. This form of creatine offers the highest absorption compared to other creatines.

KR2 Creapure® pH 10 is the only creatine product in the world with a pH stabilized at 10, since its molecules are synthesized with buffering agents using a patented manufacturing process. As a result, it remains completely stable through the acids in the stomach and reaches the muscle cells in its full extent.

Moreover this means that its metabolism does not generate creatinine as waste, a toxic substance for the kidney.

Supplement Facts

Serving Size: 2 capsules. Servings Per Container: 60

AVAILABLE FORMATS: 120 Capsules (135g).

2000mg pH10.0⁺
Creapure® pH 10

It does not require loading phases and its high bioavailability has been shown thanks to the improvement of the production of ATP (via synthesis of phosphocreatine), which exponentially increases performance, explosive strength and resistance to the most demanding workouts.

It also enhances mTOR pathway by recharging ATP stores, making it ideal for those athletes looking for a fat-free muscle growth, as well as great strength and resistance.

HOW TO USE:

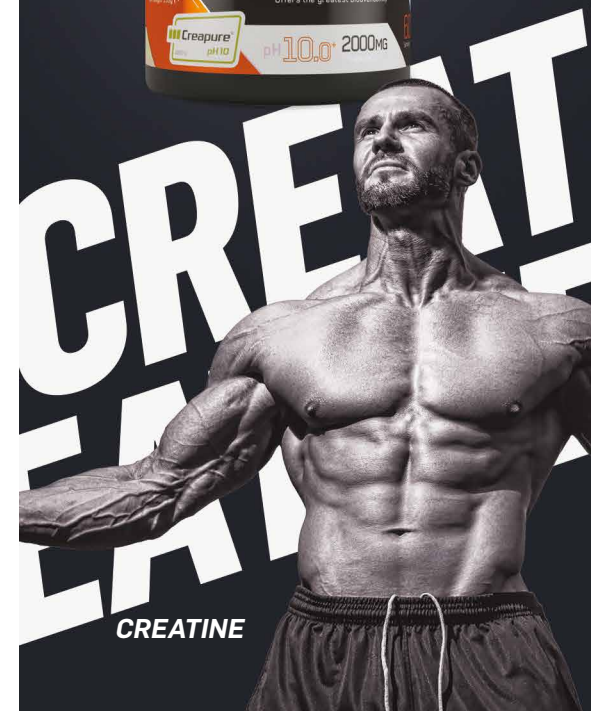

Take 2 caps before workout and 2 caps immediately after workout.

H2O

DRENALYN™

DIURETIC AND DETOX FORMULA

- Powerful diuretic function to remove any excess liquid.
- Detox factor that improves the elimination of toxins and prevents infections.
- Improves weight loss thanks to the elimination of fluids and fats metabolism.
- Regulates water balance keeping stable mineral levels.

H2O Drenalyn™ is a strong diuretic product used for weight loss. It has a unique combination of ingredients which together make a powerful formula for water retention. It is a 100% natural product, which helps to effectively drain all excess water and helps achieve your ideal weight and shape. H2O also works as a powerful detox product due to the carefully selected plant extracts and minerals, which synergistically help you to lose the excess water and bring out your muscle definition without losing the essential electrolytes.

H2O Drenalyn™ contains ingredients with a great diuretic power such as Dandelion or Horsetail that will increase weight loss thanks to the elimination of excess liquid, improving muscle definition. It also contains Red Cranberry and Juniperus Communis, which will not only increase diuretic function, but also they will improve kidney health by preventing infections and boost the immune system.

500mg

TRIBULUS™

TERRESTRIS EXTRACT

- Highest quality and purity.
- 90% total saponins, 40% protodioscin.
- Natural testosterone booster.
- Improves muscle mass and strength.
- Supports sexual health.

Tribulus terrestris is an herb that is claimed to encourage natural testosterone production without negatively impacting your body's own ability to make it. Several saponins (Tribulus Terrestris extract) have been identified as the bioactive constituents, which are responsible for anabolic and aphrodisiac effects.

Many experts believe that these saponins may enable the body to produce more testosterone by raising the levels of the Luteinizing Hormone (LH). LH regulates testosterone production through the stimulation of the Leydig cells and high levels of LH coincide with free or unbound testosterone levels. The free testosterone provides the anabolic effects which will improve your workout performance and give you amazing muscle-building results.

The active ingredient in T90 are steroidal saponins, such as diosgenin, dioscin or the most important in the increase of testosterone production, protodioscin. They have hepatoprotective effects and play a role in the reduction of LDL cholesterol levels.

750mg

Tribulus Terrestris

Some research indicates that *Tribulus terrestris* also has properties which enable it to protect the liver and the cardiovascular system. Testosterone furthermore promotes protein synthesis by maintaining a positive nitrogen balance. This, together with its diuretic effects, promotes the lean, hard muscular look.

T90 from **Starlabs®** contains 90% of steroidal saponins and 40% of protodioscin, one of the highest percentages of the market, ensuring the maximum effect in the increase of testosterone levels, increase of strength and stamina, build muscle mass and support faster recovery after exercise.

ZN + MG + B6TM

ANABOLIC MINERAL SUPPORT FORMULA

- **Regulates hormone synthesis, correcting any imbalance.**
- **Promotes healthy sleep.**
- **Supports quick and efficient recovery.**
- **Helps improve testosterone levels and increases strength and muscle mass.**

Starlabs® ZMA is a synergistic combination of Zinc Citrate, Magnesium and Vitamin B6. This special blend can significantly help to increase testosterone levels and increase strength.

Zinc, an essential mineral and antioxidant, increases testosterone levels and promotes anabolic muscle growth and repair.

Magnesium is a major mineral, which plays an important role in the body, being involved in hundreds of enzymatic reactions together with zinc, including those involved in metabolizing the macronutrients fats, proteins and carbohydrates. Magnesium is responsible for energy production and numerous studies have shown that magnesium supplementation can help reduce muscle cramps and fatigue.

ADENOVEX™

POST CYCLE THERAPY

- Optimizes natural testosterone production and improves hepatic health.
- Inhibits estradiol production by avoiding aromatization.
- Acts as a stomach protector and a natural alkalizing.
- Increases strength, muscle mass and performance.
- Supports results while you sleep.

PCT Adenovex™ is a vanguard 100% natural product designed by the R + D + i department of Star Nutraceutical™ to help your body stimulate natural levels of testosterone. It is the perfect post-cycle therapy to produce a correct normalization of the endogenous hormonal system after a regime period.

It contains a specially studied blend of ingredients as **Fenugreek** that regulates blood sugar and has affirmed benefits over erectile dysfunction, infertility and other male sexual problems; **Broccoli extract**, that inhibits the enzyme aromatase (involved in the transformation of testosterone into estrogen), thus maintaining testosterone body's levels and therefore helping to enhance it naturally; **Wild Yam extract**, which increases the production of testosterone and growth hormone; or **artichoke extract**, that helps eliminate toxins from the body by working with liver. This beneficial action on the liver promotes the elimination of any excess of estrogen, optimizing testosterone balance. **PCT Adenovex™** is complemented with Zinc Citrate, that increases natural levels of free testosterone and is a very important ingredient for the function of different enzymes, hormones, and the immune system in general and **Vitamin B6** that improves nutrients assimilation.

VITAMINS+™

MULTIVITAMIN PRO COMPLEX

- Complete mineral and multivitamin complex with 25 ingredients of the best quality.
- Optimizes the internal functioning of the organism and enhances the function of the immune system.
- Improves cellular hydration and maximizes performance, preventing cramps and muscle pulls.
- Supplemented with Lutein and Coenzyme Q10 as antioxidant to counteract free radicals negative effects.

A good multiple vitamin and mineral supplement is vital for numerous reasons; Vitamins and minerals act as essential coenzymes and cofactors in cellular generations and finally as a preventive measure for some conditions and diseases. They have an important role counteracting the early aging and cellular oxidation, improving cellular hydration, preventing stress and improving physical performance.

Starlabs® V25 VITAMINS is suitable for vegans and gives you a full spectrum of vitamins and minerals to support your vitality and to keep your body healthy. As an active individual it is important to get all the nutrients your body needs on a daily basis.

ISOLAC CFM™

WHEY PROTEIN ISOLATE

- 100% Pure Whey Protein Isolate CFM ISOLAC® from CARBERY™.
- With 5,6 grams of Leucine per daily dose to improve fat-free muscle building and to avoid catabolism.
- Rapid Release of amino acids in blood for a complete muscle recovery.
- Gluten free.
- Unbeatable flavors.

190 Isolac CFM™ is formulated exclusively with Carbery Isolac™, recognized isolate which is obtained through a complicated ultra and micro-filtration cross process. This advanced production technique is used to guarantee the best quality of the product, obtaining a high rate of protein content and retention of protein components.

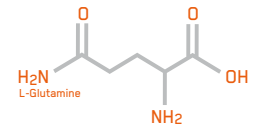

190 Isolac CFM™ is easily absorbed for rapid release of amino acids into the bloodstream, which helps the body to obtain energy, to tone, to develop muscle, and in the recovery and tissue repair. It also stimulates IGF-1 (insulin-like growth factor) for increased protein synthesis and increased muscle growth.

Proteins*

Free
Aspartame

The high concentration of pure protein isolate is due to Isolac™ by Carbery and the combined ultra and micro-filtration cross process.

The high quality of raw materials and the most advanced production technology result in an exceptional product with incredible flavors, while maintaining a low fat, cholesterol, lactose and carbohydrate content.

HOW TO USE:

Take 1 scoop (approx. 30g) with 6-7 oz (180-200ml) of cold water or your favourite beverage, shake for 20 sec and drink immediately.

CLUSTER DEXTRIN™

HIGHLY BRANCHED CYCLIC DEXTRIN

- Cutting-edge cyclodextrin that provides carbohydrates of the highest quality.
- Ultra-fast assimilation, explosive and prolonged energy supply over time to recharge glycogen storage.
- No insulin pikes, no energy drops.
- With electrolytes to maintain constant muscle hydration.

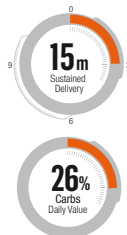

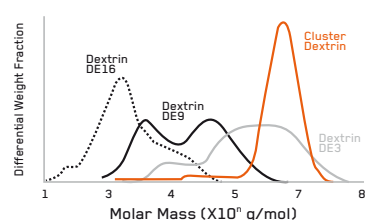

Thanks to the latest advances in industrial production of carbohydrates, Starlabs **CLUSTER DEXTRIN™** has been developed using a novel type of ultrafast digestion dextrin. This carbohydrate is designed not to generate an insulin overproduction while promoting a rapid assimilation and a supply of explosive energy.

Glucose levels remain high in blood, being perfect for activities of high demand without causing peaks of insulin. The energy coming from these carbohydrates reaches the muscles earlier and in a sustained manner, while maltodextrin, dextrose and other high glycemic index carbohydrates cause a rapid release of glucose in blood, giving an explosive energy supply, but also promoting the overproduction of insulin, which translates into a subsequent hypoglycemia and the energy "slump".

CYCLO PRO

CARBOHYDRATES

CYCLOPRO™ ULTRA FAST INTRA-WORKOUT COMPLEX

- Advanced intra-workout formula based on cyclodextrin, fermented BCAAs and electrolytes.
- 30g of cyclodextrin per service to maintain glycogen stores and to provide sustained explosive energy.
- With BCAAs and L-Glutamine to prevent catabolism, improve recovery and maximize muscle building.
- Replenishment of lost mineral salts during high intensity or long duration exercises.
- Excellent digestion, high solubility.

Thanks to the latest advances in industrial production of carbohydrates, CYCLO PRO™ has been developed combining a novel type of ultrafast digestion dextrin, Cluster Dextrin™, BCAAs of the best quality and Kyowa™ L-Glutamine.

Starlabs CYCLO PRO™ is the perfect intra-workout for athletes thanks to its high solubility and its speed to reach bloodstream.

ULTRA LOW Fast Osmolarity

Glucose levels remain high in blood, being perfect for activities of high demand. Moreover, it ensures mineral replenishment during the rehydration process that avoids sodium deficiencies (which is not achieved with common isotonic drinks).

Shorter residence time in the stomach allows design of a sports drink that is quickly absorbed in the body. The energy coming from these carbohydrates reaches the muscles earlier and in a sustained manner.

mTOR XT™

mTOR PATHWAY ACTIVATOR

- Advanced formula for the activation of mTOR pathway and the promotion of lean muscle growth.
- Instand and fermented vegan BCAAs that support rapid recovery after workouts (without added sugars).
- BCAAs 8:1:1 Ratio and supplemented with Taurine for a better neurostimulatory response.
- Osmovol Electrolyte complex for an adequate hydration.

The correct activation of the mTOR pathway has always been one of the main and most difficult handicaps in the field of sports nutrition. 8:1:1 mTOR from Starlabs Nutrition® is an all-in-one groundbreaking no-sugar formula designed to promote the most effective activation of this route, achieving an unparalleled protein assimilation for the increase of lean muscle mass.

8:1:1 mTOR contains a high dose of AMINOFORM® BCAAs with a ratio of 8:1:1, which has 8 times more leucine than the rest of BCAAs on the market. Thanks to this, the activation of the mTOR pathway is enhanced, thus achieving a greater muscle building.

Complemented with KYOWA® glutamine, it can reach an unprecedented anti-catabolic effect, preventing muscle degradation and improving recovering after the most intense training. This all-in-one formula also features glutamine and HICA. This leucine metabolite improves the anabolic environment, improving muscle building, protein absorption and avoiding catabolism.

AVAILABLE FORMATS: 390g, 780g.

FLAVORS: Cherry Coke, Green Apple, Lemon Delight, Tangerine Frost, Tropical Punch, Watermelon.

8:1:1 mTOR delivers 1g of taurine per serving. Taurine enhances endurance and recent studies show that taurine improves the absorption and effect of BCAAs. The combination of BCAAs and taurine have been proven to reduce muscle soreness even more than supplementation with BCAAs alone.

Finally, thanks to the electrolyte complex OSMOVOL+®, we have the amino acid complex most complete and powerful that exists for the best recovery and muscular construction.

HOW TO USE:

Under 160 lbs: Take 1 scoop post-workout mixed with 250-300ml of cold water. Over 160 lbs: Take 2 scoops post-workout mixed with 500ml of cold water.

AMINO ACIDS

PRO LIMITED

GFA

AMINO ACIDS

GROWTH FACTOR™ AMINO ACIDS

- State-of-the-art formula with the 9 essential amino acids (EAAs).
- With Beta-Alanine to improve performance and delay fatigue.
- Contains Astragin® to improve the assimilation of all amino acids.
- Supplemented with Taurine, vitamin C and electrolytes.
- Gluten free, lactose free and suitable for vegans.

GFA Growth Factor™ contains the proportion of EAAs recommended by the National Academy of American Sciences to maximize protein synthesis in adults over 19 years of age, and also provides these 9 EAAs in their free form (optimal form for maximum absorption).

Amino acids are the constituents of proteins and are necessary for cell function, tissue repair, and for the production of enzymes and neurotransmitters. Of the 20 existing proteinogenic amino acids, 9 are Essential Amino Acids (EAAs), and therefore cannot be synthesized by the body and must be provided by diet (or by supplementation).

GFA Growth Factor™ provides 1 gram of taurine and 1 gram of Beta-Alanine per serving, which maximizes the transport of amino acids within cells, delays the onset of fatigue, and inhibits lactic acid accumulation, thereby increasing endurance and resistance performance.

The formula has been enriched with **Osmovol + Hydration Complex®**, a new patented formula, with an exact dose of minerals and vitamins designed to improve the absorption of nutrients, nervous reactions and muscle function, also preventing cramps and muscle pain. Its studied formula of minerals and vitamins contains Potassium, Magnesium, Calcium, Sodium, Chlorine, Vitamin B12, Vitamin D3 and Vitamin B6.

To culminate this new version of the **GFA Growth Factor™**, the renowned patent **Astragin®** has been added, designed to improve the absorption and effect of various nutrients such as amino acids, minerals or vitamins among others.

HOW TO USE:

Take 1 scoop 1 time daily, preferably after workout.

CR3 PRO Creapure®

ULTRAPURE CREATINE MONOHYDRATE

- Patent of the highest quality CREAPURE® creatine monohydrate.
- The most studied and proven creatine in the world.
- Improves energy performance in the face of any physical stimulus.
- Producer of adenosine triphosphate (ATP), the body's most powerful energy source.

Increase your performance, volume and muscle development improving the health of your body. CR3 PRO Creapure® from StarLabs Nutrition® contains only and exclusively the patented Creapure® creatine monohydrate from the AlzChem Trostberg GmbH laboratory in Germany.

Maintaining our essence and commitment to the highest quality available, we only use the best raw materials with which we can offer our products to the most demanding public. For this reason, **CR3 PRO** contains **Creapure®**, which is the most studied form of creatine monohydrate in the world and proven safe and effective, in addition to being vegan and manufactured exclusively by chemical synthesis, so there is no trace of products animals or plants in its composition. Our body is able to metabolize creatine naturally, but it does so in very limited concentrations and some of it is broken down and excreted daily. For this reason, the daily requirements of creatine are sometimes not covered, especially when carrying out intense physical activity, which is why its contribution as external supplementation is highly recommended.

Supplement Facts

Serving Size: 5g. Servings Per Container: 60. Recommended Daily Dose: 1 scoop (5g).

	Amount per serving	%NRV*
Creatine Monohydrate	5000mg	**

*Nutrient Reference Value **NRV Not established.

AVAILABLE FORMATS: 300g.

Through numerous studies it has been proven that supplementation with creatine monohydrate improves energy performance levels, in addition to promoting recovery from fatigue and physical stress. All this is due to the function it performs in our body when it is synthesized as free muscle creatine and phosphocreatine, the latter being the precursor of adenosine triphosphate (ATP), the most powerful energy molecule produced at the cellular level.

CR3 PRO Creapure® from **StarLabs Nutrition®** is the perfect complement for athletes who want to improve their performance and physical fitness, but also for anyone who wants to improve their muscle health and slow down the loss of strength associated with age.

HOW TO USE:

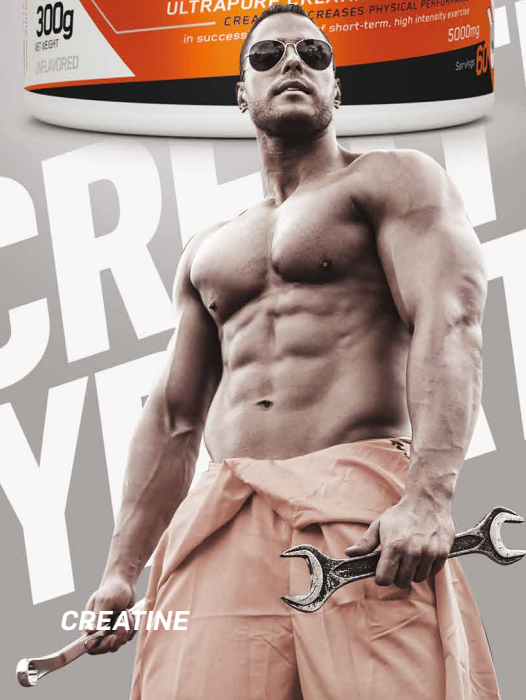

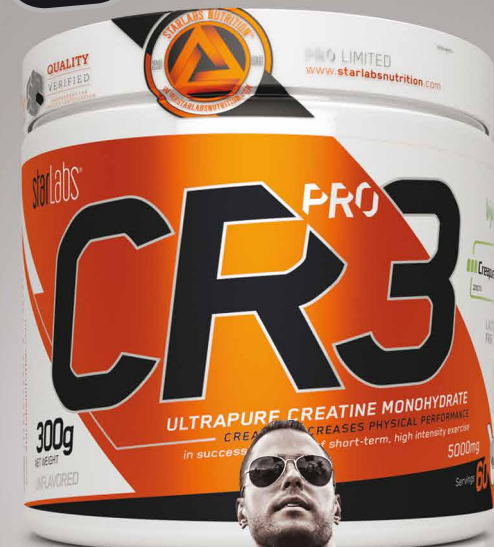

Mix 1 scoop with 8 oz (240ml) of water or juice 1 time daily, stir with a spoon. **CR3** can also be added to your favorite protein beverage.

GO2T

Go2train PRO

PRE-WORKOUT

GO2TRAIN XT™

ULTRA-CONCENTRATED PRE-WORKOUT

- Improves vasodilation and muscle congestion with a potent nitric oxide factor.
- Reduces the accumulation of lactic acid to delay fatigue.
- Unparalleled focus and stimulation without adaptation.
- Osmovol + Hydration complex for the perfect hydration.

GO2T GO2TRAIN XT™ is a power-packed all-in-one pre-workout supplement, which contains a sophisticated blend of ingredients that compound 4 matrix to support mental focus, fat loss, endurance, energy and power.

It contains a **resistance and nitric oxide formula** specially designed to delay fatigue, as well as to increase VO2max in blood.

It contains the patent **Carnosyn®**, that reduces muscle acidosis and increases performance; Betaine HCl to regulate water balance; Taurine to improve locomotor capacity and focus; L-Arginine Alfa Ketoglutarate for an increased vasodilation and muscle congestion and D-Glucoronolactone for the elimination of toxins. **ATP explosive factor**, with Creatine Monohydrate and Inosine, helps to increase the endogenous production of adenosine triphosphate (ATP) and thus increasing the energetic force of explosive way being able to beat any previous mark.

Mental Focus, stimulation and absorption Matrix is formulated under the most restrictive specifications and has N-Acetyl L-Tyrosine to increase metabolism and improve focus, Choline Bitartrate to promote a complete cognitive activation; caffeine anhydrous to achieve a correct stimulation of the CNS (Central Nervous System); Rhodiola Rosea to adapt the organism to physical stress; **Cognizin®** as a patented form of citicoline to achieve the next level of focus, **Zynamite®** as a Patented extract of mango leaves to increase the stimulation of the CNS but without creating adaptation; and **Astragin™** to improve absorption and assimilation of nutrients.

All this is complemented by the prestigious electrolyte patent **Osmovol®**, which improves water regulation and mineral balance in order to get the maximum performance.

HOW TO USE:

Take 1 scoop 30 minutes before training. Mix with 400ml water.

NH2

Stimfree PRO

**STIMULANT-FREE
THERMOGENIC**

NH2 STIM FREE® PRO

STIMULANT-FREE THERMOGENIC

- Promotes healthy fat weight loss without creating stimulation or jitters.
- Increases basal metabolism and fat tissue oxidation without affecting night sleep.
- Improves cognitive ability, memorization and mood.
- Reduces the possibility of developing metabolic and cardiovascular problems.
- Provides a hepatoprotective function and improves the elimination of heavy metals.

Appetite control and blocking function of carbohydrates and fats without affecting night sleep.

NH2 is synonymous with effectiveness and results, it is the culmination of years of study, development and empirical verification of maximum effectiveness in healthy weight loss.

NH2 RIPPED STIM FREE is a latest generation thermogenic with a formulation of the highest quality ingredients, aimed at achieving the greatest and most efficient weight loss, forcing the body to oxidize stored fat to obtain energy and block ingested fat, so that its accumulation is reduced and its elimination is enhanced.

Its complete and versatile formula also acts as an appetite suppressant, controlling food anxiety, blocking ingested carbohydrates so that their excess is not accumulated as fatty tissue, accelerating metabolism to increase weight loss and improving gastrointestinal health.

With a fast and effective effect, **NH2 RIPPED STIM FREE** is one of the most versatile thermogenics on the market since it does not contain any central nervous system stimulant, so it can be consumed at any time of the day without the risk of affecting sleep or provoke nervousness.

The secret of the unique formula of **NH2 RIPPED STIM FREE** lies in:

Garcinia Gummigutta Extract, Chitosan, Inositol, Choline Bitartrate, L-Tyrosine, Coleus Forskohlii, Raspberry extract, L-Methionine, Undaria Pinnatifida, Bacopa Monnieri and Chromium Picolinate.

2 caps. before

RIPPED XT™

CUTTING-EDGE HERB COMPLEX

- The ultimate thermogenic for maximum loss of fatty tissue and excess of liquids.
- Powerful weight loss and extreme focus thanks to its complex of thermogenic and stimulating ingredients without causing adaptation.
- Improves fat metabolism.
- Diuretic factor.

NH2 Ripped XT™ is a powerful thermogenic with a world-class, sophisticated blend of highly effective compounds that can work as appetite suppressants, reduce cravings and help the body to improve the metabolism and oxidation of fatty tissue.

NH2 Ripped XT™ has effective thermogenic properties to help your body speed up the metabolism to burn more calories and give you an energy boost to keep you motivated and focused.

It contains a **Thermogenic and Focus Complex** that increases body temperature, stimulates the central nervous system (CNS) and the basal metabolism for maximum concentration and loss of fat.

FAT BURNERS & DIURETICS

HMB MATRIX PRO CA

CALCIUM β -HYDROXY
 β -METHYLBUTYRIC ACID

HMB-CA MATRIX[®] PRO

CALCIUM β -HYDROXY β -METHYLBUTYRIC ACID.

- Improves fat-free muscle growth thanks to the activation of the mTOR pathway.
- Reduces muscle catabolism, avoiding damage to the skeletal muscle, improving recovery.
- Increases levels of strength and muscular endurance favoring greater sports performance.
- Improves endurance in strength training by reducing the accumulation of lactate in the blood.

HMB or Beta-Hydroxy Beta-Methylbutyrate is a metabolite derived from the metabolic process of the amino acid leucine, and its ketoacid alpha-ketoisocaproate or KIC, which is produced naturally in our body.

Leucine is one of the essential amino acids since the body is not able to produce it and they have to be obtained through food and supplementation. Together with valine and isoleucine they form the so-called BCAAs or branched chain amino acids. The anticatabolic effect of leucine and KIC is considered to be regulated by **HMB**.

Approximately only 5% of the ingested leucine is metabolized as **HMB**, so its supplementation thanks to the **HMB-CA Matrix PRO[®]** from **StarLabs Nutrition[™]** supposes a large contribution of 2 grams of this metabolite that is tremendously difficult to obtain naturally with consumption. of leucine given the large amount of this amino acid that would be necessary.

HMB has been shown to be a powerful anti-catabolic, much more effective than leucine, preventing muscle breakdown and improving recovery through attenuation of skeletal muscle damage induced by intense physical activity. This is due, among other factors, to the fact that **HMB** favors a significant decrease in the values of the enzyme creatine phosphokinase, one of the main markers in the processes of muscle destruction and that are increased during intense resistance exercises.

In the same way, it has been effective in maintaining the muscles of immobilized, elderly or sedentary people.

HMB also mimics insulin-like growth factor (IGF-1) to some extent, which improves protein synthesis through activation of the **mTOR** pathway, a metabolic pathway that the body uses as a means of stimulating protein anabolism. This translates into an increase in fat-free lean muscle mass thanks to cell growth which, together with the anti-catabolic effect, also leads to increased strength and accelerated muscle recovery thanks to the body's better adaptation to training.

Another of the characteristics of **HMB** resides in its improvement of aerobic performance in endurance athletes, since it increases the maximum consumption of oxygen in the blood (VO2 max). A significant effect has also been found in reducing metabolic acidosis and increasing the time before there is an accumulation of lactate in the blood.

It has been proven that a contribution of **HMB** can influence the reduction of weight and fat tissue, protecting the cardiovascular system thanks to its ability to reduce LDL cholesterol in people with hypercholesterolemia.

HOW TO USE:

Take 2 capsules daily, preferably 1 hour before training.

17TEST FX[®] PRO

ENDOGENOUS TESTOSTERONE PRODUCTION

- The most powerful and complete booster of free testosterone levels.
- Improves the immune response allowing the body to defend itself against diseases.
- Improves both the release of free testosterone and its absorption.
- Greater development of fat-free muscles, absorption of protein and energy intake.

The new formula of the 17TEST FX PRO[®] from StarLabs Nutrition[™] is the result of years of study by the Star Nutraceuticals[™] R&D department in search of high quality raw materials for maximum effectiveness in increasing levels endogenous testosterone. Not only it improves the production of free testosterone, but it also improves the absorption of testosterone by muscle tissues, thus being more effective than other test boosters on the market.

It contains a unique formulation of ingredients specially oriented to increase testosterone, to inhibit the production of estradiol, thus preventing it from converting into estrogen, improving the body's immune response, enhancing libido and improving performance against any physical effort.

DTX Liver PRO

DTX LIVER[®] PRO

CHOLINE LIVER COMPLEX

- Improves the liver nitrogen balance, so that there is a better protein synthesis.
- Helps eliminate toxins and heavy metals from the body, thus reducing stress on the liver.
- Counteracts free radicals, inflammation and liver cell oxidation.
- Helps prevent and treat various liver diseases such as fatty liver.

Contributes to the normal functioning of liver function. Improves liver nitrogen balance, detoxification and reduces oxidative stress.

The liver is the largest organ in the body, its absence or lack of proper functioning is incompatible with life, so it is essential to maintain proper liver health. It is responsible for many vital functions in our body, such as: the secretion of bile, essential for the digestion of fats, the synthesis of plasma proteins and non-essential amino acids, storage and storage of vitamins or glycogen. The liver is an extremely resistant organ, with a limited self-regenerative function that allows it to continue functioning in the event of certain damage.

OMEGA 3

EPA/DHA OPTIMUM RATIO

- Prevents from cardiovascular diseases.
- Reduces pain and inflammation in joint diseases.
- Slows the loss of bone mass and improves osteoporosis symptoms.
- Prevents from certain types of cancer (breast, prostate and colon).

Numerous studies have shown that, within a balanced diet, EPA and DHA are essential elements, taking into account that they don't only play a role maintaining good health but they are also involved in vital functions.

The absence of **Omega 3** can cause cardiovascular and brain problems, as well as aesthetic problems. Taking this fatty acid in your diet will keep the membrane of your cells permeable, improving the absorption of nutrients.

Serving Size: 1 Softgel. Servings Per Container: 90

Amount per day (3 softgels)	%DV*
Tonalin® (from Safflower Oil)	3000mg †
Contains: 80% Conjugated Linoleic Acid (CLA)	

* Percent Daily Values are based on a 2,000 calorie diet.
† Daily Value not established.

Derived from natural safflower oil, **CLA Tonalin®** (Conjugated Linoleic Acid) is a natural free fatty acid with a wide range of biological effects important for health and for the human body. Our patented manufacturing process uses CLA of the highest quality.

When you consume fat that your body doesn't need to produce energy, this is absorbed by adipocytes helped by the lipoprotein lipase enzyme. **CLA** blocks this enzyme and diverts unused fat to muscle cells. In addition, this component activates another enzyme that helps muscle to burn this fat, especially during exercise. When you use **CLA** combined with a healthy diet and a regular exercise program, this becomes very effective in helping to lose body fat and not regain it.

FORMATS: 90 Softgels.

PURE CHROMIUM PICOLINATE

SUPERIOR MINERAL ABSORPTION

Supplement Facts

Serving Size: 1 Capsule. Servings Per Container: 60

	Amount per serving	%VRN
Chromium Picolinate	200µg	62,15%

NRV Nutritional Reference Value for vitamins and mineral.

HOW TO USE:

Take 1 capsule daily, preferably with meals.

- Helps to regulate blood sugar levels.
- Improves the recharge of muscle glycogen.
- Helps to reduce fat deposits.

Chromium is a trace element that the body needs for its normal growth and development; it contributes to the normal levels of glucose in blood. **Chromium Picolinate** is the most powerful chromium form and is often used by those who want to control blood sugar levels and weight.

Several studies suggest that **chromium picolinate** could help to reduce body fat as well as to increase lean tissue mass, making it a widely used supplement for athletes. **Chromium picolinate** is highly demanded among athletes thanks to its role in the regulation of glycemia. It promotes the storage of glycogen in the muscles, optimizes the synthesis of proteins and stimulates fat degradation. An insufficient amount of **chromium** would cause a serious limitation of sports performance.

FORMATS: 60 Capsules.

KRILL OIL

PURE OMEGA 3

Supplement Facts

Serving Size: 2 Softgels. Servings Per Container: 60/120

	Amount per serving	%DV
Superba™ Krill Oil*	1000mg	†
Provides 220mg of Omega 3 Fatty Acids comprising of		
EPA (Eicosapentaeonic Acid)	120mg	†
DHA (Docosahexaeonic Acid)	55mg	†
Phospholipids	400mg	†
Astaxanthin	80µg	†

† Percent Daily Value not established.

HOW TO USE:

Take 2 softgels 2 times daily.

- Improves cognitive processes.
- Improves cardiovascular, brain and joint health.
- Increases Omega 3 blood levels.

Superba™ Krill Omega 3 is a high purity krill oil extracted under strict quality control processes. It is obtained exclusively from *Euphausia superba*, a kind of Antarctic krill, rich in EPA and DHA fatty acids, that floats on large banks in Antarctic waters and feeds on microscopic algae.

The algae that make up the krill diet are a great source of omega-3 as well as antioxidant astaxanthin, giving **Superba™ Krill Omega 3** its characteristic red color and, most importantly, acting as a natural preservative. Superba™ Krill fatty acids are forming phospholipids, which makes them better recognized by human body and much better absorbed and incorporated into tissues. Thanks to the presence of these phospholipids, **Superba™ Krill** ensures the release of key fatty acids for the proper functioning of various organs, such as brain, heart and joints.

OMEGA3 UBIQUINOL

OMEGA 3 UBIQUINOL

A NATURAL RESOURCE FOR THE PRODUCTION OF CELLULAR ENERGY

- Prevents from cardiovascular diseases.
- Increases energy and endurance levels.
- Fights against free radicals.
- Slows down aging process.

Kaneka Ubiquinol® is the reduced and active form of Coenzyme Q10 (CoQ10).

Naturally produced by the human body, **Ubiquinol** is the molecule of CoQ10 converted into its necessary form for the production of cellular energy. In addition to its key role in energy production, it is one of the most powerful lipid soluble antioxidants known to date, acting as a cell protective from damage caused by oxidative stress and free radicals. The body's ability to produce CoQ10 decreases with aging, as well as the ability to convert it to ubiquinol. It has been observed that levels of **Ubiquinol** are reduced in older individuals and in those with cardiovascular, neurological and renal problems.

FORMATS: 60 Capsules.

Both Omega 3 and Omega 6 are essential fatty acids, since the body can't synthesize them by itself and they have to be consumed through the diet. Omega9 can be synthesized from 3 and 6 and is therefore considered a non-essential.

Omega 3,6 and 9 fatty acids help to lower the bad cholesterol (LDL) and to increase the good cholesterol (HDL). They also support the immune system and assist in maintain a healthy cardiovascular system, improving blood pressure and blood circulation, memory and other brain processes.

Studies in the Omega 9 properties suggest that it reduces the risk of stroke. In the elderly, it's very important to maintain optimal levels of Omega 9, either through food or as a nutritional supplement.

NATURAL ESSENTIALS VITAMIN C

VITAMIN C

HELPS YOUR IMMUNE SYSTEM

- **Strengthens the immune system.**
- **Fights against free radicals.**
- **Enriched with bioflavonoids and Rosehip.**

Vitamin C is one of the most widely consumed vitamin. It is a powerful antioxidant and it is crucial in antibodies production. **Vitamin C** helps your immune system, strengthens connective tissues and protects other vitamins from oxidation.

The body cannot synthesize this useful nutrient, because of this, its supplementation is very important for a balanced and healthy life.

Rosehip and bioflavonoids have very interesting medicinal properties, being potent antioxidants and helping the body to absorb Vitamin C better. In addition, bioflavonoids are indicated for preventing and treating circulatory diseases, lowering blood pressure and reducing cholesterol and triglyceride levels.

	Amount per serving	%NRV*
L-Tryptophan	1000mg	**
Vitamin B6 (Pyridoxine HCl)	7,7mg	450,8%
Vitamin B3 (Nicotinamide)	5mg	31,2%

* NRV Nutritional Reference Value for vitamins and minerals. ** NRV not established.

HOW TO USE:

Take 2 capsules before going to bed.

- Improves mood.
- Helps in depressive states.
- Increases serotonin and melatonin levels.
- Improves circulation and promotes a healthy nervous system.

LACTOSE FREE

L-Tryptophan is an essential amino acid that helps to improve sleep, to reduce stress and to prevent and improve depressive processes. It is a precursor to many neurotransmitters and neurochemicals, including serotonin and melatonin.

Melatonin helps to improve sleep, and serotonin helps us to improve mood and mental health. **L-Tryptophan** also helps women with the pain and premenstrual hormonal imbalance.

Its consumption is especially important in low carbohydrate diets since it is in carbohydrates where tryptophan naturally occurs. Lack of tryptophan can cause changes of mood, mild depressions, and discouragement. The conclusion is that when on a low carbohydrate diet, it could be advisable to increase the daily consumption of **L-Tryptophan**.

GREEN TEA

GREEN TEA

THE HIGHEST CONCENTRATION OF CATECHINS

- Increases energy naturally.
- Improves cardiovascular function.
- Regulates glucose and cholesterol levels.
- Improves diuresis and fluid retention.

Multiple studies suggest a wide range of benefits from the daily intake of **Green Tea** – making this product immensely popular.

Different investigations suggest that **Green Tea** has an impressive richness of antioxidants and can assist in reducing the levels of bad cholesterol in the blood, helps to improve liver health and can support weight reduction through the stimulation of the metabolism and the increase of caloric expenditure. Furthermore, it has been shown to help to prevent constipation and atherosclerosis.

Starlabs Green Tea provides all the benefits of Green Tea and has the highest concentration of catechins on the market, maximizing the benefits of these.

FORMATS: 60 Capsules.

Serving Size: 1 Capsule. Servings Per Container: 100

	Amount per serving	%RI*
Caffeine Anhydrous	200mg	**

* Reference Intake of an average adult (8400Kj/2000Kcal)

HOW TO USE:

Take 1 dose (1 capsule) daily, preferably before training.

- Improves sports performance.
- Increases alertness.
- Reduces fatigue.

LACTOSE FREE

Caffeine is a perfect substance to stimulate your central nervous system, as well as to stimulate your circulatory and muscular systems.

Its ability to enhance alertness has been widely demonstrated through numerous studies and its role as a stimulant is due to its action as an adenosine antagonist. Its stimulant and diuretic properties promote healthy weight loss.

Caffeine Anhydrous provides the energizing effects of caffeine with no added sugars or calories. This kind of caffeine differs from normal caffeine in its water content. **Caffeine Anhydrous** is also more powerful and can be absorbed by the body faster and more efficient.

FORMATS: 100 Capsules.

HOW TO USE:

Take 1 dose (1 tablet) daily, preferably before having breakfast.

- Complete mineral and multivitamin complex with 25 ingredients of the best quality.
- Optimizes the internal functioning of the organism and enhances the function of the immune system.
- Improves cellular hydration and maximizes performance, preventing cramps and muscle pulls.
- Supplemented with Lutein and Coenzyme Q10 as antioxidant to counteract free radicals' negative effects.

A good multiple vitamin and mineral supplement is vital because of numerous reasons; Vitamins and minerals act as essential coenzymes and cofactors in cellular reactions and finally as a preventive measure for some conditions and diseases. They have an important role counteracting the early aging and cellular oxidation, improving cellular hydration, preventing stress and improving physical performance.

Starlabs® V25 VITAMINS is suitable for vegans and gives you a full spectrum of vitamins and minerals to support your vitality and to keep your body healthy. As an active individual it is important to get all the nutrients your body needs on a daily basis.

V25 contains Coenzyme Q10 and Lutein. Both are not only potent antioxidants that counteract negative effects of free radicals, but also provide benefits regarding eye health, something essential for all those who spend part of their time in front of computer or mobile screens.

FORMATS: 30 Tablets.

V25

VITAMINS+

NATURAL ESSENTIALS
R-ALA
R-ALPHA LIPOIC ACID

R[+]-ALA

R-ALPHA LIPOIC ACID

- **Powerful antioxidant.**
- **Increases insulin sensitivity and glucose uptake by muscle tissue.**
- **Essential for aerobic metabolism.**
- **Improves blood flow.**
- **Helpful in the treatment of vascular diseases and diabetes.**

Alpha Lipoic Acid is key in our metabolism, helping B vitamins in the conversion of carbohydrates, proteins and fats into energy. In addition, it has a great antioxidant potential that acts both in aqueous and fatty media, unlike what happens with Vitamin E (that works only in fat) and Vitamin C (that works only in water), being considered the universal antioxidant.

In addition, it stabilizes cognitive functions, improves memory, increases cerebral blood flow and activates intracellular signaling mechanisms capable of increasing neuron survival. It has an important role in the metabolism of glucose in blood.

Starlabs Nutrition's Alpha-lipoic acid is not only characterized by the amount of alpha lipoic acid provided (200 mg), but also by providing 100% in its racemic or R (+) form. The difference with most of the products on the market today is that they contain a racemic mixture with 50% R (+) – 50% S (-), thus decreasing its effectiveness. In nature there is only the R (+) form, being the only configuration that our body can synthesize, and being the most effective, acting as an essential cofactor for four mitochondrial enzyme complexes.

Supplement Facts

MAGNESIUM CHELATE

MAGNESIUM CHELATE

100% PURE

- **The most stable and assimilable form of magnesium.**
- **Contributes to muscle metabolism.**
- **Improves your cellular function.**

Magnesium Chelate from Starlabs Nutrition is the most efficient form of magnesium.

Chelates are chemical forms that the body can absorb easily, without competing with other minerals: its absorption is not limited by other minerals in the diet.

In the chelate, magnesium is bound to a negatively charged group, or anion, in two or more places, forming a very stable and resistant compound.

Magnesium is involved in the majority of cellular functions and the metabolism of food, being its deficiency a very important health problem with direct implications on skeletal muscle and heart health.

FORMATS: 60 Capsules.

L-Tyrosine	500mg	**

*Reference Intake of an average adult. **RI not Established.

HOW TO USE:

Take 1 capsule 1 time daily with a full glass of water first thing in the morning.

- Delays fatigue.
- Increases your brain capacity.
- Improves your mood.
- Accelerates basal metabolism, increasing the loss of weight.

L-Tyrosine from StarLabs Nutrition™ is formulated with L-Tyrosine, a non-essential amino acid necessary for the production of neurotransmitters such as dopamine and adrenaline.

L-Tyrosine is a proteinogenic amino acid (used for the synthesis of proteins) that performs several functions in the body as important as the production of melanin.

Among the numerous benefits of this amino acid we can find the following:

- Decreases stress and anxiety
- Delays fatigue during sports practice
- Prevents from psychological disorders such as depression or panic attacks
- Increases resistance to physical and mental stress

FORMATS: 60 Capsules.

VITAMIN D3

CONTRIBUTES TO THE NORMAL FUNCTION OF THE IMMUNE SYSTEM

Supplement Facts

Serving Size: 1 Capsule. Servings Per Container: 60

	Amount per serving	%NRV ⁽¹⁾
Vitamin D (Cholecalciferol)	25µg	500%

⁽¹⁾NRV Nutritional Reference Value for vitamins and mineral.

HOW TO USE:

Take 1 capsule 1 time daily, preferably be taken with the most abundant meal of the day

- Increases performance in high waste sports.
- Reduces the risk of suffering depressive disorders.
- Improves bone health.
- Helps regulate calcium balance.

Vitamin D is a fat-soluble vitamin that we synthesize when we are exposed to UV rays. It has a role in our mood and is directly related to bone and joint health.

Even exposing to sunlight and taking vitamin D through food, often **we don't reach the optimal values of this vitamin, so its supplementation is a good way to reach these levels.**

Vitamin D3™ from **StarLabs Nutrition** provides you the amount of this vitamin necessary to reach adequate levels daily.

Numerous studies indicate that low levels of Vitamin D3 can cause depressive states and increase the risk of suffering bone conditions such as osteoporosis. This vitamin is directly related to the balance of body calcium, crucial for your bones.

In the medium / long term, supplementation with vitamin D3 improves performance in athletes undergoing intense training and prevents the risk of bone or joint injuries.

FORMATS: 60 Capsules.

CURCUMIN
TURMERIC

MERIVA® CURCUMIN TURMERIC

100% MERIVA® PATENT

- Natural antioxidant.
- Powerful anti-inflammatory.
- Protects your digestive system.
- Reduces cholesterol levels.

Meriva® Curcumin Turmeric from Starlabs Nutrition is formulated mainly with turmeric extract and pepper, which helps the absorption of the active ingredients.

Turmeric has been used for many years to treat various medical conditions and is especially important for athletes or active people, thanks to its role as a natural anti-inflammatory, antioxidant and stimulator of the immune system.

Several studies have shown that curcumin inhibits compounds involved in joint pain and helps to mitigate discomfort associated to joint wear or inflammation, which means a healthier joint health and increased performance.

Moreover, turmeric exerts a great influence on the organism and the digestive system, making our digestion less heavy, reducing flatulence and detoxifying the liver.

60% ALIPHATIC ALCOHOL

POLICOSANOL

FROM SUGAR CANE

POLICOSANOL

HELPS REDUCE BLOOD CHOLESTEROL LEVELS

- Helps reduce blood cholesterol levels.
- Reduces risks of cardiovascular diseases.
- Improves sexual function.

Policosanol from Starlabs Nutrition is especially indicated for people that want to improve their cardiovascular health.

Its main function is to reduce LDL blood levels (bad cholesterol) and to increase HDL. It also prevents the formation of blood clots and reduces atherosclerotic lesions.

In numerous studies that compare therapies to reduce cholesterol, policosanol has demonstrated to have a better effect than statins. The researchers think that Policosanol can be a safe supplement to reduce and regulate LDL cholesterol levels. Even, there are clinical studies that have shown that policosanol is one of the most potent compounds to reduce cholesterol without any serious side effects. It can also reduce platelet aggregation in healthy and hypercholesterolemic individuals.

RHODIOLA ROSEA

HELPS STRENGTHEN THE NERVOUS SYSTEM

Supplement Facts

Serving Size: 1 Capsule. Servings Per Container: 60

	Amount per serving	%RI*
Rhodiola (3% Rosavins)	500mg	**
Rhodiola Rosea root (ratio 6-8:1)		

*Reference Intake of an average adult. **RI not Established.

HOW TO USE:

Take 1 capsule 1 time daily with a full glass of water first thing in the morning (15 min before breakfast).

- **Increases energy levels and post-exercise recovery.**
- **Strengthens your nervous system.**
- **Improves your mood and prevents depressive states.**

Rhodiola from Starlabs Nutrition contains as main ingredient Rhodiola Rosea, an herb that helps strengthen the nervous system, while improving natural immunity.

This plant provides numerous benefits for general health, such as the improvement of cognitive functions, the increase of sports capacities, the improvement of sexual functions and the raise of energy levels.

We could consider it a revitalizing compound of the whole organism. Formerly used to improve physical strength and endurance in Olympic athletes, today there are many benefits associated to this herb: it helps to manage stress situations, improves post-exercise muscle recovery, stimulates glycogen synthesis in muscles and liver, improves memory and concentration and helps to prevent certain types of cancer, among others.

STANDARDIZED TO 3%

PHOSPHATIDYLSERINE

REDUCES CORTISOL SYNTHESIS

Supplement Facts

Serving Size: 1 Capsule. Servings Per Container: 30

	Amount per serving	%RI*
Phosphatidylserine 80%	100mg	**

*Reference Intake of an average adult. **RI not Established.

HOW TO USE:

Take 1 capsule 1 time daily with meals, with a large glass of water or fruit juice.

- **Improves post-exercise recovery.**
- **Reduces cortisol synthesis.**
- **Increases cell membranes permeability.**
- **Prevents from muscular soreness.**

Phosphatidylserine is a phospholipid mainly involved in the maintenance of the structure of cell membranes. It is in charge of repairing the damage caused to membranes by free radicals, stress and nutritional deficiencies.

Phosphatidylserine™ from **StarLabs Nutrition** helps you recover faster, preventing muscular soreness, and promotes muscle growth, thanks to the strengthening of the muscular cell membranes and helping the uptake of nutrients.

Numerous studies have also shown that **phosphatidylserine** decreases cortisol production, minimizing muscle catabolism in times of increased stress or during prolonged periods of fasting. Phosphatidylserine is directly related to the functioning of neurons, allowing the homeostatic balance of these and repairing them after external or internal damage. It is also very important in the immune process, facilitating the recycling of aged cells and allowing the production of new cells.

Phosphatidylserine increases the metabolism of glucose in the brain and improves neurotransmission.

FORMATS: 30 Capsules.

PHOSPHATIDYLSERINE

NATURAL ESSENTIALS

CAL-MAG

CALCIUM-MAGNESIUM COMPLEX

CAL-MAG

CALCIUM & MAGNESIUM COMPLEX

- Provides the recommended daily dietary allowance (RDA) for calcium and Magnesium.
- Contributes to muscle metabolism.
- Improves cell functions.

Calcium and Magnesium are two essential minerals for the correct functioning of enzymatic reactions both in muscles and other body tissues.

Calcium contributes to the normal function of skeletal muscle and has a role in contraction processes (crucial for activities such as lifting). It also acts at bone-level, with a structural role in the maintenance of bones and teeth. People intolerant to lactose are at risk of developing calcium deficiencies, being perfect candidates for the supplementation with this mineral.

Magnesium, on the other hand, is involved in the majority of cellular functions and the metabolism of food, being its deficiency a very important health problem with direct implications on skeletal muscle and heart health. The practice of different sport activities causes a loss of magnesium that we need to recovery either through diet or supplementation. Both minerals work directly or indirectly in the synthesis of proteins and energy metabolism, so, presenting adequate amounts of these is essential to maximize our athletic performance.

Calcium and magnesium are important to a wide variety of body functions, such as mineralization of bones, serving as cofactors to many enzyme systems or sustaining muscle and nerve excitation.

Many female athletes consume less calcium than the recommended dietary allowance (RDA). This is of concern because of the need to achieve peak bone mass during adolescence and the possible relationship of poor calcium intake to stress fractures.

Athletes appear to have adequate magnesium status. However, those athletes who are on calorie-restricted diets may not be ingesting sufficient quantities of magnesium.

Data have suggested that magnesium status is indirectly related to strength improvement as well as the incidence of muscle cramps.

SLEEP™

WITH VALERIANA & WITHANIA SOMNIFERA-ASHWAGANDHA

- Fights insomnia and improves sleep.
- Antioxidant and anti-inflammatory properties.
- Reduces stress and anxiety.
- Helps to reduce cholesterol blood levels.

SLEEP™ from Starlabs Nutrition is formulated with a blend of highly effective ingredients to combat insomnia and stress and anxiety states:

Ashwagandha is a plant known since few years ago thanks to its properties to combat insomnia and stress. It has many other benefits associated with the reduction of cortisol levels, the fight against free radicals, or even, the anabolic effects related to the increase of testosterone levels.

Valeriana officinalis, one of the most used medicinal herbs, has been used for many years to threat insomnia and reduce stress associated to social situations. This plant has also been used to mitigate muscle and joint pain associated to intense exercise or pathologies such as arthritis.

L-theanine is found in the tea plant and is related to the improvement of mood and depressive processes, thanks to the increase of neurotransmitters such as dopamine and serotonin. It also has anti-inflammatory properties and antioxidant effects on cholesterol, reducing blood levels.

Supplement Facts

G-ENZYGEN COMPLEX

G-ENZYGEN® COMPLEX

COMPLETE ENZYME DIGESTIVE COMPLEX

- Improves digestion and absorption of nutrients that we take with meals.
- Reduces bloating and stomach upset due to poor digestions.
- Improves the absorption of residual gluten (traces).

Digestive enzymes are molecules that the body produces to help in the conversion of nutrients molecules into smaller portions in order to make them easier to digest and absorb.

G-Enzygen® Complex is the first complete enzyme complex that improves the absorption of residual gluten thanks to its unique formula of patented ingredients, bromelain and papain.

It contains **DigeZyme**, a multienzymatic complex that presents a scientifically studied dose of digestive enzymes that are resistant to gastric juices.

It has been added **Tolerase-G** too, an enzyme that has demonstrated its high effectiveness in the decomposition and digestion of residual gluten, receiving a positive evaluation of the European Food Safety Authority (EFSA).

Thanks to this, anyone with gluten intolerance could consume foods that may contain small traces without risk of discomfort or gastrointestinal problems.

HOW TO USE:

Take 2 capsules daily, after meals. If you have gluten intolerance, you should take before meals that can contain traces.

4xOSMOVOL®+

HYDRATION COMPLEX

- Replenishment of mineral salts lost during high intensity or long duration exercises.
- Improves nutrients assimilation and muscular function.
- Prevents fatigue and dehydration associated with exercise.

4xOsmovol® Hydration Complex is a mineral and vitamin complex that improves nutrients assimilation, nervous reactions and muscular functions, preventing muscle cramps and pain. It not only helps in the replenishment of lost salts during exercise, but it also counteracts metabolic acidosis that can cause hyperventilation, muscle fatigue and hypotension.

Osmovol contains **Sodium**, essential to maintain the body's water balance: the higher the intensity of exercise is and the higher the temperature in the environment is, the higher is the loss of this mineral. Sweat contains water as the first compound, but it also has a high concentration of **Sodium**, leading to depletion of Sodium in the body during intense or long-term exercises; **Calcium**, that is also a key component of human sweat and, for many dedicated athletes, (major losses of calcium through sweating usually exceed the amount of absorbed calcium with the diet); **Potassium**, that helps maintain plasma volume in athletes (it is important to know that between 300-800 mg of potassium is lost after two or three hours of intense exercise); and **Magnesium**, that it also escapes through sweat and urine, leading to low levels of magnesium found in athletes after strenuous exercise or competition.

Supplement Facts

Serving Size: 2 Capsules. Servings Per Container: 30

	Amount per serving	%NRV*

ASHWAGANDHA
+GINKGO BILOBA

ASHWAGANDHA + GINKGO BILOBA

WITHANIA SOMNIFERA & GINKGO BILOBA

- Helps to improve mood, reducing periods of stress and depression and counteracting the harmful effects on the body produced by these.
- Increases memory and concentration, which translates into better cognitive ability.
- Improves night rest and relaxation, essential in proper sporting progress.
- Correctly stabilizes hormonal values, improving energy intake.

Organic Aswagandha with 2.64mg of withanolides and Ginkgo Biloba with 24% flavonoid glycosides and 6% terpene lactones. Counteracts the effects of insomnia and stress, improves blood circulation, concentration, and memory.

There are certain plants used for centuries as traditional remedies for a multitude of ailments, many of them with constant use even today because, thanks to technical innovations, their great and varied benefits for the body have been demonstrated.

Two of these plants are **Ashwagandha** (Withania Somnifera) and **Ginkgo Biloba**, used for generations for various treatments such as relaxation, concentration, improving testosterone production or promoting blood circulation among others, which in the end resulted in a better physical condition, with much more energy and rest.

At **StarLabs Nutrition™** we only use the best raw materials to formulate products of proven efficacy in clinically effective amounts, that is why we have combined organic Ashwagandha with a high concentration of withanolides to enhance its adaptogenic and anti-inflammatory effect together with Ginkgo Biloba 24% of Flavonoid glycosides, percentage with which we ensure a maximum nootropic effect.

BERBERINE WITH OREGON GRAPE

- Improves cardiovascular health by reducing LDL cholesterol and triglyceride levels.
- Perfect complement to control blood glucose and the harmful effects of its high concentrations over time.
- Helps healthy weight loss processes by promoting oxidation of fatty tissues.
- Provides an anti-aging effect thanks to its intervention in different metabolic pathways.

Correct metabolic health is essential for our body to function properly, we can develop all kinds of daily activities with sufficient energy performance, as well as rest correctly and optimally use all the nutrients we eat at each meal.

In recent years there has been a drastic appearance and increase in various metabolic diseases, such as hypercholesterolemia, type 2 diabetes mellitus, metabolic syndrome or arterial hypertension, among others, which has encouraged exhaustive studies of various Ingredients that have been shown to be really effective in the treatment of this type of pathologies.

One of these ingredients that has been proven so tremendously effective is **Berberine (Berberis aristata)**, an alkaloid present in numerous plants of the Berberis genus and which has been used regularly in traditional Chinese and Ayurvedic medicine as a natural remedy to treat infections and digestive diseases. among others, as well as as a dye thanks to its intense yellow color.

Supplement Facts

Serving Size: 1 Capsule. Servings Per Container: 90

INMUNOVID

VIT C + NAC + VIT D3

- **Contributes to the proper maintenance of the immune system.**
- **Fight against free radicals by reducing oxidative stress.**
- **Counteracts cellular oxidation and early aging.**
- **Contributes to the correct absorption of calcium and phosphorus, improving muscle function.**

The immune system is made up of a series of molecules and cells that, together, manage to create biological processes in the body, which allow it to fight against any external threat such as infections, diseases or pathogens

INMUNOVID® from StarLabs Nutrition™ is a formula specially formulated with the higher quality ingredients like **Vitamin C**, **Vitamin D** and **N-Acetylcysteine (NAC)**.

Vitamin C, which is a powerful antioxidant and is crucial in the production of antibodies and the maintenance of normal function of the immune system. On the other hand, it contributes to cell protection against oxidative stress caused by free radicals, in addition to improving the formation of collagen for the normal functioning of bones and cartilage.

Vitamin D, which contributes to the normal absorption and use of calcium and phosphorus, maintaining the bone structure under normal conditions and promoting the normal functioning of the muscles, as well as contributing to the normal functioning of the immune system.

Finally, **INMUNOVID®** is supplemented with **N-Acetylcysteine (NAC)**.

SAW PALMETTO

SERENOA REPENS EXTRACT

- Helps to counteract alopecia derived from dihydrotestosterone decompensation.
- Improves urinary function thanks to the fact that it helps to counteract benign prostatic hyperplasia.
- Aphrodisiac and sexual invigorating that improves erection.

There are certain factors of our health and organism that are not easily controlled, such as hormonal decompensations that can be experienced at any age and that can lead to hair loss, or urinary or sexual problems at a certain age due to growth. exaggerated prostate.

For these cases, although it is very difficult to avoid these factors, we can counteract the harmful side effects produced by them, and for this, **Saw Palmetto** is essential.

Saw Palmetto is obtained from the fruits of the *Serenoa Repens* plant, an indigenous plant of the North American Southeast and composed of a series of bioactive substances, such as fatty acids, flavonoids, phytosterols or polysaccharides. It is in fact one of these fatty acids that it contains, oleic acid, which mainly produces the most beneficial effects of **Saw Palmetto**. While other brands use the dry extract of **Saw Palmetto** almost completely eliminating its important contribution of fatty acids, in **StarLabs Nutrition™** we use an extract with 45% of fatty acids, which supposes a much greater effect of its beneficial properties.

Supplement Facts

Serving Size: 2 Capsules. Servings Per Container: 60

Amount per serving

Saw Palmetto dry extract

200mg

Serenoa Repens (W.Bartram) 45% Fatty acids.

FORMATS: 120 Capsules.

Saw Palmetto works by inhibiting the 5-alpha-reductase enzyme in those people who have an overactive function of this enzyme and who, due to this, may suffer from metabolic and hormonal problems such as alopecia associated with dihydrotestosterone or hyperplasia benign prostatic.

In addition, it has been used for decades as an aphrodisiac and invigorating, and this is because it shares the same mechanism of action as drugs such as Sildenafil, thus enhancing the erection. Improves prostate health by inhibiting benign prostatic hyperplasia.

HOW TO USE:

Take 2 capsules daily.

Leather Gloves

High quality training gloves to improve grip during lifting. Adjustment with double self-adhesive strip in the fist for a better grip of the wrist.

Starlabs brings you its new flexible gloves with reinforced seams, ideal for improving your grip on heavy loads.

Knee Pad Neoprene

Starlabs Neoprene Knee Pads offer you an excellent support around knee articulation, protecting it from wear produced by intense workouts or competitions.

These neoprene kneepads are indicated in activities like weight lifting, crossfit and high impact activities.

Wristbands

When you lift heavy loads, you need additional support for your wrists. Starlabs wristbands provide you the protection you deserve thanks to its reinforced seams and its elasticity.

The softest touch and the maximum comfort to accompany you during the most intense workouts.

Technical T-shirt

SIZES: M, L, XL

Our Trainity Technical Shirt has a sport design slightly elastic that allows you to train comfortably and practice any type of exercise, either outdoors or in closed facilities.

Lifting Hooks

ONE SIZE

Starlabs steel lifting hooks promote the increase of weight during workout, minimizing the risk of injuries and providing comfort and fixation on the wrist.

They have Velcro wrist straps that create a stable fit.

Gloves

COLORS:  

High quality training gloves to improve grip during lifting. Adjustment with double self-adhesive strip in the fist for a better grip of the wrist.

Grid Pads

Starlabs grid pads provide great strength and comfort when lifting heavy loads, improving grip and reducing friction and abrasion. Its lightness allows the air to flow through your hands, cooling them.
